MD. SHARJIL ZAIDI

JUNIOR CLOUD & DEVOPS ENGINEER | AZURE | CI/CD | INFRASTRUCTURE AS CODE

sharjilzaidi.dev@gmail.com | +91-9552272435 | Hyderabad, India | linkedin.com/in/sharjil-zaidi-b2996b421 | github.com/Sharjilzaidi29

PROFESSIONAL SUMMARY

Entry-level Cloud & DevOps Engineer with hands-on experience building CI/CD pipelines, deploying applications to Microsoft Azure, provisioning cloud infrastructure, and implementing automation through Azure DevOps. Skilled in Azure, Azure DevOps, Git, CI/CD, Infrastructure as Code, ARM Templates, Terraform, Azure CLI, PowerShell, Bash Scripting, and Linux. Hands-on experience with Azure App Service, Virtual Machines, Load Balancer, VNets, Entra ID, RBAC, and Azure Monitor. Seeking a Junior DevOps, Cloud Engineer, or Azure DevOps Engineer role to contribute to cloud infrastructure and automation initiatives.

CORE SKILLS

- **Cloud Platforms:** Microsoft Azure, Azure Virtual Machines, Azure App Service (PaaS), Azure Storage, Azure Load Balancer, Traffic Manager
- **DevOps & CI/CD:** Azure Pipelines (YAML & Classic), Azure Repos, Azure Artifacts, Deployment Gates, Approvals, Service Connections
- **Infrastructure as Code:** ARM Templates, Terraform, Azure CLI, Azure PowerShell
- **Version Control:** Git, GitHub, Azure Repos — branching, merging, pull request workflows
- **Networking:** Azure VNets, Subnets, Network Security Groups (NSGs), Load Balancers, Health Probes
- **Identity & Security:** Microsoft Entra ID (Azure AD), RBAC, Azure Key Vault, App Registrations, IAM
- **Monitoring & Data:** Azure Monitor, Log Analytics, Azure SQL Database, Blob Storage, File Storage
- **Operating Systems & Scripting:** Linux (Ubuntu/RHEL), Bash Scripting, SSH
- **Agile:** Azure Boards, Scrum, Sprint Planning, Test Plans
- **Other:** Docker, Kubernetes (AKS), AWS Exposure

CERTIFICATIONS & TRAINING

- Oracle Cloud Infrastructure (OCI) Certified Architect Associate — Oracle University | Aug 2026
- Azure DevOps Training — AZ-400 Aligned — Naresh IT, Hyderabad
- Planned Certifications: Microsoft Azure Administrator (AZ-104) | Microsoft Azure DevOps Solutions (AZ-400)

PROJECTS

E-Learning Web Application — CI/CD Automation

Cloud & DevOps Project | Azure | Azure DevOps | Git | Linux | Node.js

Repository: github.com/Sharjilzaidi29/MyElearningWebAppProj

- Implemented a CI/CD workflow using Azure DevOps, connecting Azure Repos with Azure Pipelines to automate application builds.
- Configured an Azure Pipeline using Node.js 22 LTS on Linux to automatically trigger CI builds on source-code commits.
- Published build artifacts and configured a Release Pipeline to deploy the application to Azure App Service.
- Configured a Microsoft Entra ID application registration and Service Connection for Azure DevOps authentication to the Azure subscription.
- Applied Contributor RBAC permissions through Azure IAM to enable the deployment workflow.
- Enabled Continuous Deployment so successful builds automatically trigger application releases without manual deployment steps.
- Troubleshot an Azure App Service deployment issue using Kudu/Advanced Tools Bash Console and corrected the wwwroot directory structure.
- Outcome: Built an automated Git commit → CI build → artifact → Azure App Service deployment workflow with no manual release step.

High-Availability Web Infrastructure with Load Balancing

Cloud Infrastructure Project | Azure | Load Balancer | VNets | IIS | Entra ID

Repository: github.com/Sharjilzaidi29/Azure-HighAvailability-LoadBalancer-Project

- Deployed two IIS web-server Virtual Machines within the same Azure VNet, region, and Availability Set to improve application availability.
- Configured an Azure Load Balancer with a backend pool, TCP port 80 health probe, and load-balancing rule.
- Removed public IP associations from the backend VMs and routed inbound application traffic through the Azure Load Balancer.
- Validated traffic distribution between both web-server nodes through browser-based testing.
- Performed a live failover test by stopping one VM and verifying continued application access through the healthy VM.
- Configured Microsoft Entra ID group-based access and assigned Contributor permissions at the resource-group level.
- Applied least-privilege access principles while onboarding the operations team.
- Outcome: Successfully validated application availability during a simulated single-VM failure.

EDUCATION

B.E. in Civil Engineering — Babasaheb Naik College of Engineering, Pusad (Amravati University), 2022–2026, **7.43 CGPA**
HSC (12th) — Late N. M. Tribal Jr. College, Marsul, Pusad (Maharashtra State Board), 2021–2022, **79.33%**
SSC (10th) — Jyotirgamaya English Medium School, Pusad (Maharashtra State Board), 2019–2020, **75.20%**
Languages: English, Hindi, Marathi, Urdu
